

Ring Size – SOPHY GUIDE

METHOD 1

Find the right size for your new Sophy ring using the following steps.

You need: **A RING** that fits you and **A RULER**

STEP 1: bring a ring that you already have at home and that fits you.

STEP 2: place the ring on the ruler and measure the diameter of the inner circle through which the finger passes.

STEP 3: compares the measured dimension with the table below.

| Ring size | Diameter |
|-----------|----------|
| 52 | 16,5 mm |
| 54 | 17,2 mm |
| 56 | 17,8 mm |
| 58 | 18,5 mm |
| 60 | 19 mm |

Each ring is adjustable so it will fit your finger even if you get the ring number wrong.

METHOD 2

STEP 1: print the guide on A4 format in **100% SCALE/ACTUAL SIZE**. You can check the correctness of the print size by placing a bank card on the bottom square. Your bank card must fit perfectly into the outlines/field below.

STEP 2: bring a ring that you already have at home and that fits you in size.

STEP 3: the line of the drawn circle should fit the inner circle of your ring. If your ring size is between two numbers, we suggest you choose the larger number.

size 52

size 54

size 56

size 58

size 60
